

With **Complete Data Protection** by Domain Technology Group, you can rest assured that your data is being backed up in a format that is not only secure, but also easily recovered when you need it.

**Complete Data Protection** supports single file, complete application and total server restoration and keeps your critical business data safe.

## **How does our Complete Data Protection keep your Critical Business Data Safe?**

### **Complete Data Protection Is Easy to Implement and Very Affordable for Small And Midsize Businesses**

- ✓ We provide onsite backup as frequent as every fifteen minutes by using NAS (network-attached storage). No more unreliable rotating tapes, they are gone!
- ✓ You can back up ALL of your data including proposals, project plans, invoices, AR, AP, manufacturing, distribution, financials, and email, and not be limited to the size of your tape drive.
- ✓ With our archiving function you select your own offsite data retention periods.
- ✓ If connection between the servers, NAS, and data centers is interrupted, alarms will sound and our technician will immediately investigate the disturbance. The appliance is monitored 24/7.
- ✓ You have an option to backup data at one of our state-of-the-art data centers. During transport data is encrypted at 256 bit AES and remains encrypted while stored!
- ✓ Your downed servers are restored in 30 minutes or less. We offer restoration for complete application, single file and bare metal server (rebuild servers on new hardware FAST).
- ✓ Should you experience a devastating loss of facility in the event of a disaster, we will rebuild within one day.
