

5 BIG REASONS

Why you can trust Domain Technology Group

1. Our State-Of-The-Art Data Centers Provide:

- Backup images initially stored at one center and then replicated to a second center
- Internet connectivity by multiple providers with automatic failover
- Data encryption in transit and while stored
- Fiber optic backbone within the facility
- Full physical security at each facility and intrusion protection
- Secure Network with high-end redundant firewalls
- Fire suppression and environmental controls
- Automatic power backup with on-site generators

Refer to www.domain-group.com/proact-itbdr/index.asp for more information.

2. We unconditionally guarantee the availability of your data or your money back. If the data is given to us, we will guarantee it will be available to you 24/7 or we'll give you your money back!

Most remote backup services try to promote money-back guarantees, but if you read the small print, they only refund the last 3 months of service fees. We're willing to put our money where our mouth is and give you a full year's service fees back if we fail to make your data available.

3. We carry liability insurance to cover YOU. We carry a \$1 million dollar policy to cover errors and omissions. Do you know if your current IT person covers you this way?

4. We offer free help desk support for recovering files. Some companies charge you extra for this service, or don't offer it at all.

5. We are an established IT consulting company with a real, live office. That might not seem too unique to you, but what you don't realize is that some offsite data companies are made up of a couple of guys working from their back bedrooms with no way of actually reaching them other than by e-mail or phone. In the event of a disaster, our local data storage and recovery sites will rebuild within one day.
