Domain Technology Group, Inc., of 1210 Broadcasting Road, Wyomissing PA., announces the formation of a new business entity, Domain Implementation Services, Inc. This new highly specialized business unit focuses on SAP® Business One, an integrated, affordable business management application designed specifically for small and growing businesses, and SAP® Business ByDesign™, a comprehensive, fully-integrated and adaptable on-demand business offering, designed specifically for midsize companies that want to grow profitably. In addition to that, Domain Implementation Services today announces it has become an SAP® Business ByDesign™ solution reseller authorized to market, sell and deploy SAP Business ByDesign as well as offer additional services.

The formation of Domain Implementation Services, Inc. follows the recent combination of Domain Technology and certain assets of Accelbus, Inc., a leading Philadelphia based channel partner for SAP Business One.

“We have been looking for this type of growth opportunity throughout the last two years during the economic downturn. Now, with this addition to the Domain Technology family, our clients in the mid-size arena can grow along with us. Not only does this venture instantly increase our SAP practice from a clientele and consultant perspective, it also expands our geographical reach dramatically. I am also very excited about becoming an authorized reseller of SAP’s fully integrated on-demand business management suite for the midmarket, SAP Business ByDesign. This solution is designed as best-fit for companies who want the benefits of large-scale business management applications without the costs of supporting the corresponding IT infrastructure. SAP Business ByDesign unifies multiple business operations and aligns the way people actually think and work. We expect that SAP Business ByDesign will have considerable effect on the small to midsize market space, where we play,” said David Kramer, Domain Technology Group’s founder and president.

Domain Implementation Services, Inc., is currently executing SAP projects and promoting growth in small and mid-sized companies from New York to Miami and Philadelphia to Los Angeles, as well as internationally in China.

“We are pleased to have Domain Implementation Services as a new SAP Business ByDesign solution reseller,” said Frank Iannotti, vice president, SAP Business ByDesign, North America, SAP. “The combination of experienced Domain and Accelbus consultants results in a very powerful ERP

implementation and consulting team. They have the proven capability to consult on and implement ERP projects demanded by small and mid-sized enterprises. We are looking forward to working with Domain Implementation Services.”

As market leader in enterprise application software, SAP helps companies of all sizes and industries run better. SAP’s North American headquarters is in Newtown Square, PA. Its world headquarters is in Walldorf, Germany.

Domain implements systems that consolidate companies’ critical data into one centralized protected database. These enterprise-wide systems eliminate sidebar reports and disconnected spreadsheets and generally safeguard and streamline its clients’ information systems. The ERP systems enforce certain financial controls and transactional propriety.

Domain Technology Group, Inc., the original company, designs, implements, and supports its clients’ supporting Microsoft network infrastructure. The firm, founded in 1998, is based in Wyomissing, Pa and supports clients along the East Coast with a majority of its customers along the 422 corridor extending from Reading to Philadelphia.
