

SAP Business One:

Business Management Made Simple For Small to Midsize Enterprises

Summary

Run better with the new release of the SAP® Business One application, designed exclusively for small, midsize, and emerging businesses that want to fully integrate their business operations and grow profitably. Developed through strong co-innovation with SAP partners, the new release helps speed time to value, gain real-time insight, and increase ease of use and affordability.

Objectives

- Deliver a fully integrated solution tailored to small business needs
- Accommodate changing needs with on-premise and cloud deployment models and mobile access
- Integrate software with partner and other applications, such as the Ariba Network
- Facilitate application installation and upgrade

Solution

- Enhanced support for supply chain business processes for faster order processing and optimized stock movement
- SAP Business One studio to simplify customization and integration with third-party tools
- Centralized implementation framework for ease of installation and upgrade
- Flexible reporting and analytics, including the exchange of reports and dashboards over the Web

Benefits

- Enhanced business insight with integrated reports and dashboards
- Faster time to value with streamlined implementations and upgrades
- Rapid integration enterprise-wide and with third parties
