

Transform Your Operations with Intelligent ERP Solutions

Streamline manufacturing, distribution, and financial operations with SAP Business One, SAP HANA Cloud, and AI-driven analytics — expertly implemented by Domain Technology Group.

Who We Are

Domain Technology Group implements enterprise resource planning (ERP) systems that connect every part of your business. Just as important as the ERP package you select is the team you choose to implement it.

Domain fields a strong team of experts in finance, distribution, manufacturing, warehouse management, and cybersecurity. We also bring deep expertise in complementary platforms — working with:

- Znode for B2B eCommerce integration
- Braintree for secure payments
- Prodimex for warehouse management
- PaceJet for shipping automation

Our focus: implementing best practices and making customers hyper-efficient.

Our Core Solutions

SAP Business One ERP

- Unified management for finance, inventory, production, and customer data.
- Cloud, on-premise, and hybrid deployment options.

SAP HANA Cloud & Analytics Cloud

- Real-time dashboards and predictive insights.
- Machine learning models that forecast demand, flag risks, and optimize decisions.

AI/ML Integration

- Predict inventory shortages before they happen.

- Identify supplier reliability and optimize scheduling.
- Transform reports into actionable recommendations.

Cybersecurity Services

- Secure design principles across every implementation.
- Protection for sensitive financial and customer data.

Connected Ecosystem

Domain integrates SAP ERP with leading business platforms to extend performance and visibility:

- Znode B2B eCommerce → Real-time product, pricing, and account integration.
- Braintree Payments → Tokenized, PCI-compliant payment automation.
- PaceJet Shipping → Streamlined logistics and carrier management.

Why Domain Technology Group

- Certified SAP Partner with 20+ years of ERP expertise.
- AI and analytics implementation specialists.
- Focus on measurable outcomes and long-term ROI.
- U.S.-based support with global reach.
